

Northbridge Manufacturing — Benefits & Enrollment Guide

Document ID: HR-BEN-002 · Effective: January 1, 2026 · Owner: People & Culture

This guide summarizes health, retirement, and supplementary benefits available to eligible Northbridge employees, and explains how to enroll during the annual open enrollment window.

Eligibility

Full-time employees become eligible for health and dental coverage on the first day of the month following 30 days of continuous employment. Part-time employees working 24 or more hours per week are eligible for a prorated benefits package. Temporary and contract staff are not eligible for company benefits.

Health & Dental Plans

Northbridge offers two medical plans. Employees may change plans only during open enrollment or within 30 days of a qualifying life event (marriage, birth, adoption, or loss of other coverage).

Plan	Employee Monthly Premium
Standard PPO	\$120 (single) / \$310 (family)
High-Deductible + HSA	\$45 (single) / \$140 (family)

The company contributes \$1,000 annually to the HSA for employees enrolled in the High-Deductible plan, deposited in quarterly installments.

Retirement Savings (401k)

Northbridge matches employee 401(k) contributions dollar-for-dollar up to 4% of base salary. Employees are automatically enrolled at a 3% contribution rate after 60 days and may adjust or opt out at any time through the Fidelity portal. Employer match vests fully after two years of service.

Open Enrollment

Open enrollment runs annually from November 1 to November 21, with elections taking effect January 1. Enrollment is completed in the WorkDay portal (form HR-F-040). If no changes are submitted, current elections roll over automatically, except for HSA contributions, which must be re-elected each year.

Life & Disability

All full-time employees receive company-paid basic life insurance equal to 1x annual salary and short-term disability coverage at 60% of salary for up to 12 weeks. Supplemental life coverage may be purchased during open enrollment.
