

Northbridge Manufacturing — IT Acceptable Use & Security Policy

Document ID: IT-POL-003 · Effective: April 1, 2026 · Owner: Information Technology

Accounts & Authentication

Multi-factor authentication (MFA) is mandatory for all corporate accounts. Passwords must be at least 14 characters and are rotated only upon suspected compromise, per current NIST guidance. Shared accounts are prohibited.

Device & Data Handling

Company data may be stored only on managed devices or approved cloud services (Microsoft 365, the corporate Google Drive tenant). USB mass storage is disabled by default; exceptions require an IT ticket (form IT-F-020) with manager approval, valid for 30 days.

Software & AI Tools

Only software from the approved catalogue may be installed. Use of external AI tools with company data requires the data to be classified Public or Internal — Confidential and Restricted data may only be used with the company-approved AI platform.

Incident Reporting

Suspected phishing, malware, or data exposure must be reported to the Security Operations Center within 1 hour of discovery via the Report Phishing button or the SOC hotline. Lost or stolen devices must be reported within 4 hours so remote wipe can be initiated.
